

Abhijeet Rajbhar

Software Developer — MERN Stack Developer

9335122608 | abhijeetrajbhar436@gmail.com | LinkedIn | GitHub

SUMMARY

- Software Developer skilled in MERN stack, RESTful APIs, and scalable backend systems. Proficient in JavaScript, Node.js, Express.js, React.js, and MongoDB with strong foundation in Data Structures, Algorithms, and OOP.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C

Frontend: React.js, Redux Toolkit, Tailwind CSS, Material UI

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, SQL

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems

Tools: Git, GitHub, Postman, VS Code

Deployment: Vercel, Render

PROJECTS

HealthGuardian – Healthcare Management System | *MERN Stack*

Ongoing

- Designed and developed a full-stack healthcare platform to manage patient records and streamline doctor-patient workflows using MERN stack.
- Implemented JWT-based authentication and role-based access control (RBAC) for Admin, Doctor, and Patient roles to ensure secure system access.
- Developed RESTful APIs for handling patient history data, improving backend scalability and data retrieval efficiency.
- Integrated Multer with cloud storage for secure upload and management of medical reports and documents.
- Enforced admin-controlled data modification policies to maintain data integrity and prevent unauthorized access.
- Currently integrating AI-based assistant to provide contextual health recommendations using patient historical data.

RestroOne – Food Delivery Web Application | *MERN Stack, Stripe*

- Developed a full-stack food delivery application enabling seamless ordering, cart management, and order tracking.
- Engineered responsive UI components for menu browsing and cart operations, improving user interaction and experience.
- Designed RESTful APIs for order processing, user management, and efficient backend data flow.
- Implemented JWT-based authentication and role-based access for secure user and admin operations.
- Integrated Stripe (test mode) for handling payment workflows, including duplicate and failed transaction scenarios.

School Management System | *MERN, TypeScript, Prisma*

- Built a modular full-stack school management system supporting attendance, assignments, grading, and result processing.
- Developed backend APIs using Node.js, Express, and Prisma ORM with MongoDB for scalable data management.
- Implemented JWT authentication with refresh tokens and role-based access for Admin, Teacher, and Student.
- Designed responsive dashboards using React and Tailwind CSS with efficient state management.
- Enhanced application security using bcrypt password hashing, Helmet, and CORS policies.

EDUCATION

Kamla Nehru Institute of Technology

Master of Computer Applications

Sultanpur, UP

Aug. 2024 – Present

Babasaheb Bhimrao Ambedkar University

Bachelor of Computer Applications

Lucknow, UP

Aug. 2021 – May 2024

CERTIFICATIONS

AKTU AI Tech Hackathon 2025: HCL GUVI, May 2025 Certificate.

JavaScript Certification Course: Complete Coding by Prashant Sir , April 2025 Certificate
